Directory of Research Journals Indexing

Brief History

The total number of journals indexed in Open Academic Journals Index (OAJI) has reached in 2000.

Scope and Coverage

DRJI includes near about 3530 indexed journal titles with their bibliographic information. DRJI includes only research related journal articles. It covers various journals from 105 countries, around the globe. Directory of Research Journal Indexing (DRJI) is one of the best reference tools for academic open access web resources. Directory of Research Journal Indexing is a digital collection of education research

and information. Each DRJI record contains bibliographic data like title, author, ISSN or ISBN, publisher information, frequency, etc. and an abstract.

Kind of Information

In DRJI entries are appeared here in a listed form (after browse by frequency, discipline, start year, country, license). Under an entry (hyperlinked title of journal) detail bibliographic information of that particular entry is available here. In DRJI, the bibliographic information includes title, publisher name, publication year, frequency, ISSN (Print/Online), country, language, organization name, journal description, license type etc. An example is given below for clear understanding.

Results for INDIA country...
