Scope and Coverage

This site covers detail description of biological term and that are arranged by prefix and suffix. Biography of biologists is presented in this site with photos. Biographical information covers different stages of life with photographs, schooling, personal details,

career, profession, achievement and innovation. Biographical information presents large number of description.

Kind of Information

Entry contains year of birth, year of death, introduction that describes why the person is famous and in which field, early schooling, college and career, personal details, marriage life, place and house where he or she lived and autobiography of that notable person if present with photos of each stage of his life span and photos of his/her school and college. Notes are also available with biographical description.

The screenshot shows a website titled "Charles Darwin's Autobiography". On the left is a vertical navigation menu with buttons for Home, Donations, Search, Theory, Origins, Hybrids, Dictionary, Roots, Prefixes, Hominids, Biologists, Contact, and Privacy. The main content area has a header "Famous Biologists" with left and right navigation arrows. Below the header, there is a paragraph of text: "The first and, in some ways, the best biography of Charles Darwin was written by Darwin himself. To fill out the story, Darwin's original text is here offered with added illustrations, links, and explanatory notes. The notes are either inserted at the bottom of each page or, more often, into the text itself (in square brackets)." To the right of this text is a portrait of a young Charles Darwin. Below the portrait is a caption: "Charles Darwin as a young man". To the left of the portrait is a "Contents:" section with a list of links: "1. Introduction >>", "2. Early Schooling >>", "3. Edinburgh >>", "4. Cambridge >>", "5. The Beagle >>", and "6. Back in England >>". To the right of the portrait is a paragraph of text: "For those who tire of the unrelenting adulation found in the biographies of Darwin produced by other writers, the autobiography may come as something of a relief — unlike his other biographers, Darwin is actually willing to criticize himself from time to time. The story, as he tells it, also has the large advantage of being told from the standpoint of what he himself saw as significant in his own life." At the bottom of the page, it says "First published in *The Life and Letters of*".
