Bertrand Russell

Early Life

Bertrand Arthur William Russell was a mathematician, philosopher, historian and logician. He was born on 18th May 1872 in Trellech, Mountmouthshire. His father was Viscount Amberley and his mother was Katherine who was the daughter of the second Baron Stanley of Alderley. Russell was orphaned when he was only three years of age and was brought up by his grandmother who was a Countess, wife of the Prime minister. His childhood was filled with depression with the early death of his parent and siblings. He often thought of suicide but what kept him away from it was mathematics. In the beginning he was mostly home tutored but later on his life turned a new page after his introduction to the works of Euclid and Percy Bysshe Shelley.
