AccuWeather, Inc

Brief History

The network was founded in 1962 by Joel N. Myers, then a Penn State graduate student working on degrees in meteorology.

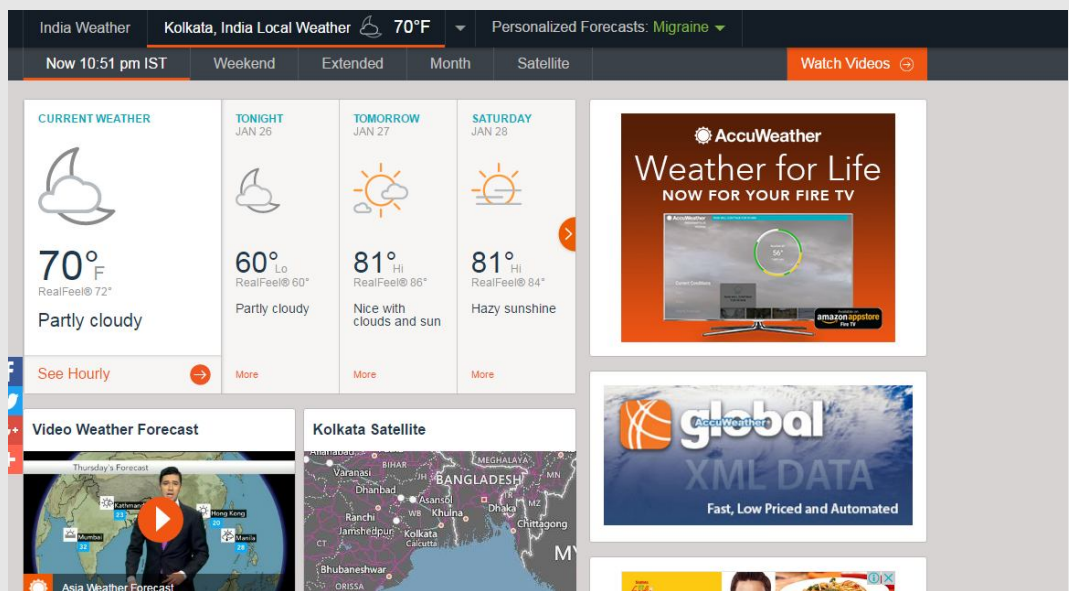

Scope and Coverage

This site contains satellite, weather forecast maps, weathernews, weathervideos, weather blogs, personalities and more. It also forecast today's weather, hourly forecast, current weather and personalised planner. AccuWeather's forecasts and

services are based on weather information derived from numerous sources, including weather observations and data gathered by the National Weather Service and meteorological organizations outside the United States, and from information provided by non-meteorological organizations such as the Environmental Protection Agency.

Kind of Information

Entry on “India Weather” contains satellite maps, day wise weather forecast, weather news, weather videos, weather blogs, and changes of climate. Entries on “Kolkata, India Local Weather” include current weather, tonight’s weather, and tomorrow’s weather, Kolkata satellite, weather of nearby places of Kolkata and more.
