Database of World Gazetteers

Synopsis

A gazetteer is a geographical dictionary or directory, an important reference for information about places and place names, used in conjunction with a map or a full atlas. It typically contains information concerning the geographical makeup of a country, region, or continent as well as the social statistics and physical features, such as mountains, waterways, or roads. Examples of information you would find include the location of places, dimensions of physical features, population, GDP, literacy rate, etc. This information is generally divided into overhead topics with entries listed in alphabetical order. Populated places e.g. cities and towns Database of Place Names
