Research and Reviews

Scope and Coverage

Research and Reviews is an open-access journal publication that aims to serve authors and readers (scientists as well as general masses) by providing them an easy and reliable source of knowledge. Research and Reviews publishes 39 International Journals, among them 28 journals are peer-reviewed, dispersing advance knowledge in the field of Pharmacy, Medical, Nursing, Dental, Agriculture, Engineering Technology and Arts.

Research and Reviews includes peer-reviewed journals like Journal of Agriculture and Allied Sciences, Journal of Ecology and Environmental Sciences, Journal of Food and Dairy Technology, Journal of Veterinary Sciences, Journal of Educational Studies, Journal of Social Sciences, Journal of Microbiology and Biotechnology, Journal of Dental Sciences, Journal of Engineering and Technology, Journal of Botanical Sciences, Journal of Chemistry, Journal of Pure and Applied Physics, Journal of Zoological Sciences, Journal of Material Sciences, Journal of Statistics and Mathematical Sciences, Medical and Clinical Oncology, Neuroscience, Orthopaedics, Urology, Journal of Biology, Journal of Medical and Health Sciences, Journal of Medicine & Health Care, Journal of Nursing and Health Sciences, Pharmacy and Pharmaceutical Sciences, Journal of Hospital and Clinical Pharmacy, Journal of Medicinal & Organic Chemistry, Journal of Pharmaceutical Analysis, Journal of Pharmaceutical Quality Assurance, Journal of Pharmaceutics and Nanotechnology, Journal of Pharmacognosy and Phytochemistry and Journal of Pharmacology and Toxicological Studies.

There are some other journals that are not peer-reviewed. They are International Journal of Advanced Research in Electrical, Electronics and Instrumentation Engineering, International Journal of Innovative Research in Computer and Communication Engineering, International Journal of Innovative Research in Science, Engineering and Technology, Journal of Global Research in Computer Sciences, Journal of Applied Science and Innovations, Journal of Clinical and Medical Case Studies, Reports in Cancer and Treatment etc.

Kind of Information

Research and Reviews provides a wide range of standard articles that are published after a stringent peer-review process along with expert's updations and are appreciated by millions of readers all over the world for our unbiased performance and quality output. Several countries contribute papers to their journals. Each issue carries useful reviews and articles of immediate interest to the practicing professionals as well as researchers.

Abstract

The science of mice has been examined for quite a long time with the fundamental motivation behind irritation control. With the coming of exploratory ways to deal with human medicinal consideration, mice have turned into the most famous creature model framework as a result of the numerous likenesses between their physiology and that of people. All the more as of late, they have been utilized as a part of a considerably more extensive scope of investigative studies went for controlling their genome. With the advancement of olfactory neuroscience from 1990s and sequencing the entire mouse genome toward the start of 21st century, olfactory correspondence is currently learned at cell and atomic levels. The information of mouse science helps in ideally outlining mouse behavioural trials additionally mouse lodging conditions and keeps away from pollution of olfactory flagging variables that may influence the outcomes fundamentally. These laboratory mice have lots of application in Medical Research as well as in novel drug discovery.

Keywords
Immunodeficient nude mice, C57BL/6, Transgenic mice.

After selecting a particular article, it is seen that each review comes with reviewers name & details, received date, received date, and accepted date of the article, abstracts, full text keywords, other related information, and references. There are two types of group of review. One is 'High Impact List of Articles' & another is 'Conference Proceedings'. Articles/conference proceedings can be downloaded after selecting.

Special Features

- ❖ Users can get all news related to it, after subscribing through e-mail.
- ❖ Links to PlagScan, plagiarism software.

Arrangement Pattern

Volumes are arranged chronologically. Under each volume issues are also arranged chronologically. Each issue is arranged content-wise.

Research & Reviews in Pharmacy and Pharmaceutical Sciences Volume 5, Issue 4	Research & Reviews: Journal of Nursing and Health Sciences Volume 2 Issue 3 October, 2016	Research & Reviews: Journal of Zoological Sciences Volume 4, Issue 3 December, 2016
---	---	---

Remarks

Research and Reviews provides a wide range of standard articles that are published after a stringent peer-review process along with expert's updating and are appreciated by millions of readers all over the world for our unbiased performance and quality output. Several countries contribute papers to their journals. Each issue carries useful reviews and articles of immediate interest to the practicing professionals as well as researchers.
