Standards Australia

Brief History

Standards Australia is a standards organization established in 1922 and is recognized through a Memorandum of Understanding with the Australian government as the peak non-government standards development body in Australia. It is a company limited by guarantee, with 73 members representing groups interested in the development and application of technical standards and related products and services. The Memorandum of Understanding between the Commonwealth and Standards Australia recognizes Standards Australia as

Australia's representative on the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC) and the Pacific Area Standards Congress (PASC). SAI Global provides a commercial database of Australian standards, called "SAI Global - Standards Online". SAI Global founded in 2003.

Scope and Coverage

The SAI Global make possible accessing and buying the Australia standards related to the subjects like agriculture, aircraft and space vehicle engineering, chemical technology, Civil engineering, Clothing industry, Construction materials and building, Domestic and commercial equipment, Entertainment. Sports, Electrical engineering, Electronics, Energy and heat transfer engineering, Health protection and Safety, Food technology, Glass and ceramics industries, Health care technology, Manufacturing engineering, Metallurgy, Railway engineering etc.

Kind of Information

The standards can be found under the subject like Construction equipment or . Each entry on a specific standard provides information like the name of the standard and the specific subject, general product information like document type, status, publisher, Committee, Supersedes, availability of standards, format and price which vary from country to country. So there is an option to choose the country name from pull down menu. Side by side the suggestion for other standards is also provided at the left page of each entry.

To access this product/service online there is a link named "Find out how to manage Standards collections online" and to know what regulations affect and change there is a link like "Stay up to date with changes to legislation and regulations". To copy or network a particular standard there is a link like "Get permission to copy or network a Standard". The "Standards watch" option is for knowing the resent changes or other updates on standards.

Special Features

- SAI Global provides options for subscribe, like "On-Line Select", "On-Line Premium", "NSS+Standards", "BCA+Standards", "PCA+Standards" etc.

- One can search for standards on the basis of amendments and drafts.

Arrangement Pattern

Here one can search for a standard on the basis of subjects and publishers (like standards Australia, British Standards Institution, Rail Industry Safety and Standards Board, Japanese Standards Association, International Organization for Standardizatio). The Subjects are further divided and subdivided and all of them arranged alphabetically. The name of the publishers is also arranged alphabetically.

Remarks

SAI Global is a publicly listed risk management, standards compliance and information business. It make easy to know about the Australian standards for buying them as necessary. For that purpose to facilitate the users it arranges all the standards under specific and micro topics of a specific subject.
