Brief History

Standards New Zealand is a standards organization and the operating arm of the Standards Council, which is an autonomous Crown entity operating under the Standards Act 1988.

Scope and coverage

As well as New Zealand and joint Australia/New Zealand standards, the organization supply almost all standards published by overseas standards bodies, including ISO,

IEC, BSI, and ASTM. At the organizational website the standards are provided to be searched by categories like generalities, Terminology, Standardization, Documentation, Sociology, Services, Company organization and management, Administration, Transport, Mathematics, Natural sciences, Health care technology, Environment and health protection, Safety, Metrology and measurement, Physical phenomena, Testing, Mechanical systems and their components for general use, Fluid systems and components for general use, Manufacturing engineering, Energy and heat transfer engineering, Electrical engineering, Electronics, Telecommunications, Audio and video engineering, Information technology. Office machines, Image technology, Precision mechanics, Jewellery, Road vehicle engineering, Railway engineering etc.

Kind of Information

Standards New Zealand is a business unit within the Ministry of Business, Innovation and Employment. Standards New Zealand is a self-funded, not-for-profit organization. In this website one can find standards on the above mentioned topics. Under each topic the list of total hyperlinked standards are provided. If one wants to know about the specific standard from the list then he or she has to click on that standard and it redirects the specific entry on that standard. The entry on one standard provides information like the name of the standard, the title of the standard, product details of the standard, publishing information, options for buying product, etc.

Special Features

- The standard related updated news is provided by the Standards New Zealand.
- The organization through this website provides services like online library service, Asset Plus hard copy update service, membership subscription service, etc.
- The organization has international engagements like international relationships, regional relationships, international updates, IECEx hazardous seminars, IECEx meetings, etc.

Arrangement Pattern

At the home page under the heading “Search & Buy Standards” includes the standard catalogue in pdf file. The heading “Search for Standards” under the heading “Search & Buy Standards” provides hyperlink list of broad categories. Under each category the list of hyperlinked total standards are provided.

Remarks

Standards New Zealand is an International Organization for Standardization (ISO) member organization, that develops internationally aligned New Zealand standards (NZS) and participates in standards-related activities that deliver benefit to the nation. Standards New Zealand and Standards Australia work together to develop joint standards (AS/NZS). The majority of standards are developed in this partnership.
