Publisher

Federal Competitiveness And Statistics Authority

Brief History

The UAE had adopted a competitive approach to its development in order to promote sustainable growth & prosperity on the 21st century.

Scope and Coverage

FCSA endeavors to support all UAE institutions and individuals alike, as well as its international partners, across all sectors. It provides statistical data using geographic information systems, disseminates statistical data in accordance to statistical calendar and provides statistical data and information of government agencies. It emphasizes the powerful impact of statistics and competitiveness on policy making and strategic planning. Within a competitive framework, the public and private sectors both play different but interrelated roles to create a productive economy. It reviews and analyzes a number of international reports and rankings to gauge the country's performance along its development agenda.

Kind of Information

Information on jobs and queries on career related information can be known by mailing a given mail-ID. Information is given on two main service categories which are :

- Public sector services
- Business sector/individual services

Information on UAE current standing can be known from given table. Examples are like:

Report Name	Global Ranking	Regional Ranking	Report Date
Edelman Trust Barometer	5 ▼	1 -	2017
Global Entrepreneurship & Development Index	19 -	1 -	2017
The Global Innovation Index	41 ▲	1 -	2016

Country wise indicators can be selected. Otherwise, results also can be found after selecting subject-wise indicators, reporting area etc. Important statistical abbreviations are given here. Different types of queries can be done and those can be solved after going through some steps serially. It also gives idea on 'Statistical Magazine' i.e. the electronic magazine which can be considered as a statistical platform specialized in the statistical affairs and matters issued quarterly by the FCSEA on its website.

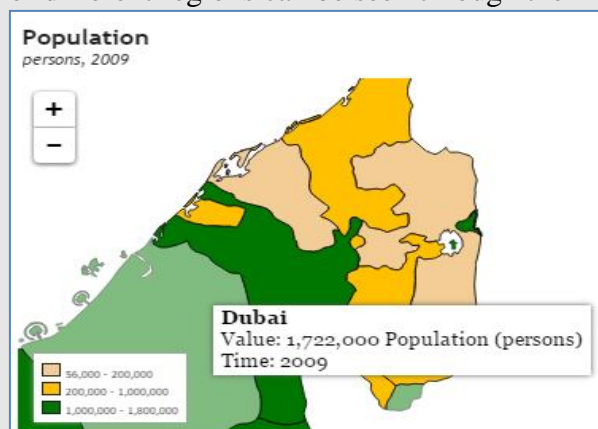

It provides statistics on different major categories like economics, social & demographic, agriculture, environment etc. including their micro categories. Region wise population data estimates can be seen in graphical representation as follows:

In the open data, relevant statistics are given in tabular format with graphical representation wherever needed. An example is shown below:

Water	
	United Arab Emirates
Population with improved water, %	100.0(2010)
Population with improved sanitation, %	98.0(2010)

Population of different regions can be seen through the map at a glance like:

Datasets on different topics can be found from data catalog. It also gives information on e-participation policy and its publications.

Special Features

- Font size can be changed.
- Advance search can be done.
- Mobile app can be downloaded from the given link.
- Provision for RSS Feed is available.
- Statistical reports (in PDF & excel formats) and media kits can be downloaded.

Arrangement Pattern

Different publications like reports and bulletins are arranged in descending chronological order as shown below:

 Consumer Price Indices Annual Bulletin, 2016	 Economic Report 2003
 Consumer Price Indices Annual Bulletin 2015	 Economic Report 2002
 Consumer Price Indices Annual Bulletin 2014	 Economic Report 2001
 Consumer Price Indices Annual Bulletin 2013	 Economic Report 2000

In data catalog, subjects are arranged alphabetically as follows:

A	Agriculture (1)
B	Business (1)
D	Demographics (1)
E	Education (1)

Remarks

It plays a global role model that contributes to the UAE's advancement and prosperity. It can be considered as a competitive framework, articulated as a wide-ranging set of policies and actions, enables the UAE to build for the long term and embrace economic transformation by leveraging its competitive advantages.
